

Professional Duplication

The CopyDisc series of professional copiers, designed and manufactured by Verity Systems, offer standalone, automated duplication of CDs & DVDs.

Available with 4, 8 or 12 drives, the CopyDisc 4 and CopyDisc 8 (fitted with 52x CD-R Plextor or 8x DVD±R Pioneer drives) offer high-speed duplication of up to 220 disc per session. For larger capacities, the CopyDisc 12 can accommodate 1100 discs on its revolving turntable – suitable for even the most demanding of duplicating professionals.

All CopyDisc duplicators are easy to use, with all command operations being entered via the control panel. Your CopyDisc duplicator will not only automatically detect the type of CD/DVD master (CD ROM, CD-XA etc.) without any user intervention, but will also provide “frame accurate” Data and Audio including UPC, ISRC and audio indexes.

In addition, the compare master and compare copy modules allow both CDs/DVDs and images to be verified for complete data integrity assurance.

Built To Last

The CopyDisc range utilises the proven integrity and reliability of the Verity Systems firmware for automatic format recognition, failsafe operation and consistent high quality CD/DVD duplicates time after time. With a robust, steel casing and accurate pick and place robotics, CopyDisc duplicators are built to last.

Standalone or Networked

CopyDisc duplicators are standalone systems requiring no PC connection. However, all CopyDiscs are also network compatible and can be incorporated into an existing network via our duplication management software – TrueNET 2. Multiple users can send images to any CopyDisc on their network remotely from their PCs.

Warranty

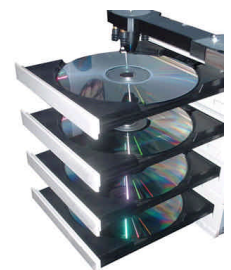

12 months back to base, all parts and labour included. Extended warranties also available.

Product Features

- Automatic CD & DVD Duplication
- Large 220 to 1100 Disc Capacity
- Office & Production Solutions
- High Speed – CD-R/RW or DVD±R/RW writers including Dual Layer capabilities
