

Product Features

600 & 300 dpi printing modes

Laser Sharp Text

Flip Up Design for Quick & Easy Ribbon Replacement

Waterproof Labels – Requires no Drying Time

Also prints mini discs & CD business cards

The PowerPro II thermal transfer printer is a second generation printer for the effective and inexpensive labelling of CD and DVD discs. You can print high-speed, durable text and graphics onto a wide variety of standard lacquer-surface media types, eliminating the need for special printable surface discs.

Print Resolution & Speed

The Power Pro II thermal printer can print CDs at either 300 or 600 dpi and has a printing speed from around 15 seconds per disc (depending on image resolution and printer mode).

Durability of Images

As thermal inks are used in the print process the drying time required by some other printing methods is eliminated. Cost per copy is also very affordable when compared to other printing methods. The low cost thermal ribbon can produce over 2000 images at full coverage.

Changing ribbons is easy, as the Power Pro II's unique flip open, quick-change system eliminates the time consuming task of threading new ribbons underneath the printer heads.

The versatility of the printer is enhanced by the easily changed business card & mini disc trays plus the PowerPro II can be easily integrated with CopyDisc autoloaders.

Unique Flip-open design means ribbon changes are quick & simple to do

Easy To Use Control Panel

Business card & Mini Disc Optional Adapters

Warranty

12 months back to base, all parts and labour included. Print heads are warranted for 30 days. Extended warranties also available.
