

**Product Features****Photo-Realistic Images on CDs & DVDs****Fast & Affordable Production****Incredible Price Performance Ratio****No Need to Coat Discs****Desk-top printer or combine with****CopyDisc automated loading system****Includes easy to use graphics software**

The TEAC P-55 is the ideal solution for stand-alone on-demand CD or DVD printing. It produces the world's finest high-quality, professionally printed CD and DVD discs. Thanks to an innovative thermal re-transfer print system, 4-colour, extremely durable full colour CMYK discs can be created quickly and effortlessly.

Latest Technology

Using the latest in re-transfer printing technology, the TEAC P-55 permanently seals the image in place. The discs, once printed, are scratchproof, UV-protected and water repellent. This results in an absolutely borderless, exceptional quality print result.

Fast and Economical

A single disc takes from 80 to 120 seconds to print and there's no need to coat! The TEAC P-55 offers excellent value for money and saves up to 30% in comparison with conventional printing methods.

Easy to use

The TEAC P-55 is supplied with easy to configure and use software. This allows any user to quickly generate images for print with text, graphics, logos etc. in full colour.

Three ribbons sets are available: Photo, Colour & Black. Colour ribbon is suitable when printing simple pictures, graphics & text. Photo ribbons offers greater colour range than the colour ribbon and should be used when the very best resolution is required. A thermal supplementation process means that as the image is being produced, the head temperature is adjusted which changes the colours on the photo ribbon to give more variation on hues and tints.

The TEAC P-55 is designed as a professional solution that can be used in various corporate areas and industries and is perfect for software and music distribution, for company presentations or for local sales promotions. Professional duplicators will also find the TEAC P-55 to be an invaluable addition to their just-in-time applications.

Warranty

12 months back to base, all parts and labor included.
Consumables items are not warranted.
Extended warranties also available.
