

TrueNET 2 is a sophisticated and versatile duplicating and printing management system, allowing multiple users to send CD and DVD images and print files to a CopyDisc remotely from their own PC.

Product Features

- Duplicate & Print Remotely**
- Duplicate Multiple Jobs Simultaneously**
- On the Fly Mastering**
- Job Queuing**
- Dynamic Printing**
- Database Integration**
- Windows 2000 & XP Compatible**

TrueNET 2 includes a range of advanced features such as the ability to queue jobs and to process two or more duplication jobs simultaneously. For example: with a CopyDisc8P an operator could queue eight separate masters for duplication, requiring one copy of each. All eight masters will be duplicated and printed in one session.

In addition, TrueNET 2 can automatically create CD and DVD images on the fly. Simply select the PC directory where your files are stored, request the number of copies and select copy. TrueNET 2 will take the PC files requested and create an ISO CD or DVD image as the files are transferred to the duplicator.

API scripts (Application Programme Interface), can be used to provide a powerful interface between TrueNET 2 and a third party software application. User can integrate a CopyDisc duplicator to an in house production or sales order system for example, and create "on demand" CDs or DVDs.

Printing

Easy to use disc labelling software called 'Label Designer' is built-in so that you can quickly design professional-looking disc that print directly onto printable-surface CDs or DVD via your CopyDisc Prism Plus or CopyDisc TEAC P-55 models. API also enables dynamic printing, allowing for unique labels to be produced easily using the output of a database. For example, it is possible for an operator to produce ten CDs with a different name/number printed on each individual disc.

Warranty

12 months back to base, all parts and labour included. Extended warranties also available.

Easy To Use

TrueNET 2 has an easy to use interface:

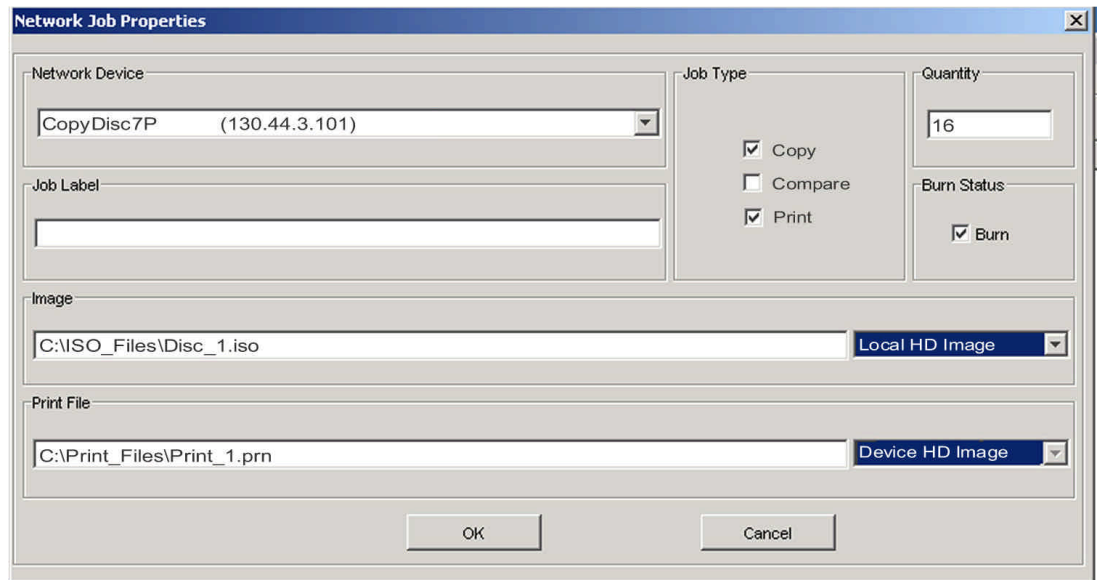

Step 1: Select the CopyDisc model you wish to use from the "Network Device" field

Step 2: Select whether to copy, print or both in the "Job Type" field

Step 3: Choose the number of discs you want to produce in "Quantity"

Step 4: Locate the Image and/or Print File you wish to copy from your local PC hard drive or from the CopyDisc's internal hard drive

Step 5: Click OK

Specifications:

Minimum System Requirements

Network: Windows 2000 or Windows XP
800Mhz Pentium III or faster

Storage Requirements: 128 MB of RAM
1 GB of Hard Disk Space

Connection: 100Mbit Ethernet connection (TCP/IP)

Screen Resolution: 800 x 600 with 65536 colours

CopyDisc Firmware: 4.76 or higher

Recommended System Requirements

Network: Windows XP
2 Ghz or faster Pentium IV

Storage Requirements: 512 MB of RAM
1 GB of Hard Disk Space

Connection: 100Mbit /Gbit Ethernet connection
(TCP/IP)

Screen Resolution: 1024 x 768 or higher with 16M colours

CopyDisc Firmware: 4.76 or higher

API Printer Support: Prism Plus & TEAC P-55
