

Continuous High Energy Degausser

Conveyor Systems for the high volume user:

Since the introduction of high coercivity metal tapes the need for a powerful degausser capable of erasing Betacam Digital/SP, MII, DAT and DVC Pro in high volume has become essential.

The V100 has been designed to meet the requirements of the high volume user. It is a conveyor unit, runs continuously and with one pass gives erasure figures in excess of 75dB on 1500 oersted tape. With a throughput of over 10,000 cassettes per hour, and capable of handling all compact media from floppy discs to high energy cassettes, the V100 provides the user with probably the most efficient high energy degausser available.

Features:

- * **Continuous Duty**
- * **Conveyor Operated**
- * **Erases Metal & Oxide Tapes**
- * **Fast One Pass**
- * **High Throughput**
- * **Bi-axis magnetic field operation**

AGENT:

Specifications: V100

Erasure:

- 75dB on 1500 oe tape
- 80dB on 750 oe tape

Media:

Floppy discs, 10 packs; cassettes - including Beta SP, MII, D2 S & M, R-Dat, 8mm VHS, VHS U-Matic, Betacam, 3480, DC600, 1000, Audio Tapes, Beta SP, Digital Beta, VHS Digital, DVC Pro, Digital S.

Throughput: Typ: 10,800 Beta SP cassettes per hour

Belt Speed: 0-17 IPS

Belt Width: 6"

Operating Voltages:

- 240/220 volts 50Hz
- 220/208 volts 60Hz

Current: up to 30 Amps

Duty Cycle: Continuous

Dimensions:

- Height: 19.0" (48.2cm)
- Width: 44.5" (113cm)
- Depth: 20.5" (52cm)

Weight: 209lbs (95kg)
