

4 & 8mm Tape Degausser

The V870 provides a comparatively light weight and compact degausser designed to meet the exacting standards demanded by professional users of 4mm, 8mm and VHS cassettes. The data and broadcast industries will be particularly attracted to the "deep erasure" and high throughput performance of this professional machine that offers many features lacking in more expensive erasers.

High throughput of the media to be degaussed is achieved by a conveyor with a belt speed of 10 inches per second, transporting cassettes over dual erasing coils that ensure clean and effective erasure. The design of the V870 will be of interest, in addition to the broadcast industry, to operators in the duplicating, production, voice logging and instrumentation recording industries, who will benefit from the increase in quality and efficiency that the *VERITY SYSTEMS* V870 will bring.

- Features:**
- * Erases 4mm,8mm, VHS, Beta, S-VHS
 - * High speed belt
 - * Light weight
 - * Low cost - rugged - efficient
 - * Erases up to 1500 Oe 4mm media

Specifications: V870

Erasure: 75dB
Media: Cassettes:
 4mm, 8mm.
 S-VHS, VHS, Audio,
 Betacam, Betamax,
 DAT, Compact Cassettes

Throughput:
 4mm & 8mm: over 3000 per hour
 VHS cassettes: over 1800 per hour

Operating Voltages:
 240/220 volts 50Hz
 115 volts 60Hz

Current Rating:
 4 amps typ (50 Hz)
 6 amps typ (60 Hz)

Belt Width: 4.5"

Belt Speed: 50 Hz 8 ips
 60 Hz 10 ips

Duty Cycle: 50 % per hour dependant
 on ambient temperature

Dimensions:
 Height: 4³/₄" (120mm)
 Width: 11⁵/₈" (295mm)
 Depth: 30¹/₂" (775mm)

Weight: 48lbs (22kg)

Specifications subject to change without notice
