

VS4000 Series

CD & DVD Case Over-Wrappers

Product Features

CD Jewel Case, Slim Line Jewel Case & DVD Case Wrappers
Professional Wrap Quality
Better Finish than Shrink Wrapping
Table Top Unit – Easily Transportable
Wrap up to 250 case per hour
Semi-Automatic Operation
Low Cost Investment

Operators wishing to wrap small to medium quantities of CD and DVD cases can now achieve a quality finish equal to the standard of more expensive finishing machines, with the VS4000 series of over-wrappers from Verity Systems.

Available for standard jewel cases (VS4000), slim line jewel cases (VS4000sl) and now DVD, "Amaray" type cases (VS4000-DVD), these tabletop units are dedicated to small or medium scale production of discs and are a cost effective solution providing professionally finished packaging for short run work, at a tenth of the cost of industrial equipment.

Easy To Use

The semi-automatic operation is simple and effective. A pre-cut sheet of polypropylene wrapping material is placed on the manual platform. The case is simply placed on the pre-cut sheet and the operator closes the cover, which tensions the wrapping and makes the first heat-seal. The case is then placed into the hopper for the second fold and seal operation, which is fully automatic. The result is a professionally folded and sealed CD or DVD case.

The sealing temperature is electronically controlled and can be set to the desired value. An electronic security system stops the machine operating in the case of incorrect usage.

Polypropylene wrapping material can be supplied in boxes of 10,000 sheets from Verity Systems.

The result is a professionally folded and sealed CD or DVD case suitable for even the best retail presentations and all this for a fraction of the cost of outsourcing.

The first seal is made manually

Warranty

12 months back to base, all parts and labor included.
Extended warranties also available.

Options

VS4000X:
Additional unit for completing the first manual seal for the VS4000 CD jewel case wrapper.

Sheet Thickness:	.00013" (32 microns)	.00013" (32 microns)	.00013" (32 microns)
Option:	VS4000X To increase throughput	N/A	N/A

Retail Ready CDs & DVDs

The VS4000 series give a wrapping finish equal to that of CDs & DVDs found in any retail outlet. Whilst shrink wrapping leaves cases with rough, unsightly seams, the VS4000 series of wrappers provides a neatly folded and sealed package.

Increase Throughput

VS4000X

The VS4000X has been designed to increase the throughput of the VS4000 standard CD jewel case wrapper, allowing the operator to wrap up to a total of 500 cases per hour. This small table top unit enables an extra operator to complete the first seal stage.

The VS4000 series of wrappers are from the Verity Systems range of desktop packaging solutions of on-demand CDs and DVDs. Other equipment in this range include:

MEP120 CD/DVD Sleevers; VS450 CD/DVD Labelers; VS650 CD/DVD Packer; VS350 Universal Labeler

Verity Systems maintains a policy of continuous improvement and reserves the right to amend this specification without notice.
